A CONTRACTOR OF THE PARTY OF TH

September 5, 1958

P. W. Johnson, Obie, Fritz talked re: Carrizo. We will require bond covering improvements.

September 16, 1958

Mel Merkin phoned Fritz re: Carrizo. Mel will come in this a.m. to see what can be worked out.

Mel Merkin in office to see Fritz re: Carrizo. Talked to Fritz. I gave him the two new locations, which he over heard me give to John Temanek (Tidewater to Later he came back and asked for the Kerr-McGee Hortenstine #1 location.

no permit (5-9)

The state of the s

CARRIZO

August 8, 1958

Mel Merkin and a Mr. Murphy in office regarding General Petroleum plugs. (Merkin is Beseyan's Phoenix counsel.)

August 13, 1958

Mel Merkin in office and submitted a permit for the Carrizo Oil and Gas Corporation in Sec. 6, T. 19 N., R. 23 E., Navajo County, which will be a rework of the Creager State well. Mr. Merkin brought in bond and fee in the amount of \$25.00.

August 20, 1958

Mel Merkin phoned in regard to progress made on the Carrizo intent. Fritz told him it would be about 2-3 days.

August 22, 1958

Mel Merkin phoned and asked if intent was approved for Carrizo. I told him no. Said he had a call from Detroit, and we were to call him when it was approved.

August 25, 1958

Mel Merkin in office re: Carrizo application.

August 27, 1958

Mel Merkin, Obie, Emmet & FCR - conference re: Carrizo. Opinion: If geologic ok from PWJ, then permit to issue provided: Carrizo tenders check for cost of casing.

August 29, 1958

Mel Merkin in Re: Carrizo. Says they propose to run wire line logs only.

Called PWJ concerning electro-logging by Carrizo. He gave ok to electro-log only provided: copy of logs are furnished to the State.

Mel Merkin agreed to a limited permit, but the Commissioner vetoed such a permit. Obie will talk to Mr. Finley to-nite on the phone.

September 2, 1958

Mel Merkin in re: Carrizo. Was to come back later when Obie out from under. (Chimamen)

Obie told Mel Merkin to go to Holbrook and see Mr. Finley to work out permission and arrangement to operate in the well with a limited permit.

900 permit (59)

Attention: John Bannister Executive Secretary

Dear Mr. Bannister:

In reference to your letter of June 7th, in 1958 or 1959 the Carrizo Oil & Gas Corporation took out a permit to reopen the Kreiger State #1 Well that had been drilled by the Mobile Company in approximately 1948 at this location.

A bond was supplied the State of Arizona for the contemplated work. This work was never started due to problems of entry with Mr. Finley, among other things.

We did not reopen the well or do any work of any type and finally cancelled our plans entirely. This was explained to the State of Arizona Oil and Gas Commission at that time and our bond was released.

I hope this clears the matter up.

Sincerely yours,

CARRIZO OIL AND GAS CORPORATION

June 29, 1960

Mr. Louis Abrams 9625 So. Alameda Street Los Angeles, California

Dear Mr. Abrams:

Mr. Merkin, your attorney, contacted this office today regarding the release of bond of the Carrizo Oil & Gas Corp. on State #1 well, Section 6, 19N, 23E, Navajo County, Arizona. The bond on this well had been released per my letter to you of April 13, 1960. I do wish to make a correction in that my letter notes the bond number to be S-10-59403. The number should be S-10-58403.

I am this date mailing to the Fidelity and Casualty Company of New York a carbon copy of this letter.

I sincerely hope this completes your transaction with the Surety Company.

Sincerely yours,

W. F. Maule Petroleum Engineer

(Oil & Drilling Bond)

Gentlemen:

This will acknowledge receipt of your recent letter, concerning the above captioned drilling bond.

We do not feel that you, as surety, can cancel this bond, until the requirements of the State of Arizona are complied with. We are trying to contact the company, to ascertain whether or not they are in accord with the cancellation of this bond, for the reason that if no drilling operations were conducted, we will withdraw the drilling permit with their permission. If operations were conducted, then certain forms will be required to be filed with this Commission, before the bond may be released.

If your clients can give us this information and authority to cancel, then we are in accord and upon filing with us the necessary information, we will approve your cancelling the bond.

Yours very truly,

MEMORANDUM

To:

Obed M. Lassen,

State Land Commissioner

From:

Phillip W. Johnson,

Geologist

Subject:

Carriso Oil & Gas Corporation

We have received from the Carrizo Oil & Gas Corporation of 9625 South Alameda Street, Los Angeles, California with Mr. Lou Abrams, Acting Secretary and Mr. Melvin J. Mirkin, Arizona Statutory Agent, located at 7561 North 16th Lane, Phoenix, Arizona as principals of the Carrizo Oil & Gas Corporation on O&G 51 form, a request to re-work and re-log the General Petro-leum-Creager State well, located in the SW1 of Section 6, Township 16 North, Range 23 East. They have also submitted \$2,500 bond and a \$25.00 check covering permit fee.

It has been established by you that this well is the property of the State of Arizona and an effort has been made to determine the present condition of this hole. A visit to the well has revealed that there is a cement plug at the surface of the 13 3/8" casing. The depth of this plug is unknown and every effort which was made to get some factual data concerning the condition of the well has proven fruitless.

From information received from General Petroleum and our files, it would seem that there is about 800° of 13 3/8" casing in the hole and the rest is open hole. Salt water was reported encountered at 135° and cased off. Water of better quality was encountered in the Coconino formation at about 1127° and artesian pressure caused the water to rise in the well bore to an unknown altitude. If this water is of poor quality, it is possible that it is a source of contamination to the upper beds which it has access to because of the artesian pressure and the absence of any casing. This could possibly affect any wells which may be drilled down dip of the formation. If the water is of good quality it is possible these beds overlying the Coconino would contain enough gypsum or other soluble minerals to cause the water to be progressively more mineralized down dip from the well.

If it were possible to make Carrizo Oil & Gas Corporation by virtue of their re-working the well in any fashion or to any depth, responsible for the proper plugging of this hole, I believe it would be to

4. permit (51)

the State's advantage, as well as to the local interest, to let them proceed with their operation. I believe that we would want to be present when they open the hole up to check the water level and quality, and also be present to assure proper plugging of the well.

It is further recommended that whatever steps are needed should be taken to insure the State's interest in this well be maintained and restored when they complete the work.

Under the Oil and Gas Regulations, it would be expected that we would receive complete copies of all logs and drilling data. In view of the above stipulations, I am okaying their intention to re-work this well.

Respectfully submitted,

Phillip W. Johnson, Geologist

Commence of the Commence of th

September 18, 1958

Mr. James L. Finley P. O. Box 136 Gilbert, Arisona

Dear Jim:

This is written concerning the old General Petroleum well on Section 6. Township 19 North, Range 23 East, which section is part of your State grazing lease No. 681.

Since our telephone conversation on 29th of August in which we discussed the proposal of a State oil and gas lessee to go in and re-work the well, certain facts have been brought into the picture which have influenced my thinking on the problem. I am taking this opportunity to acquaint you with these facts, which I believe to be complete, so you will understand the background on which I have based my decision.

Our records disclose that the well in question was drilled on land originally covered by and described in an Oil and Gas Prospecting Permit granted by the State Land Department of Arisona to George C. Creager by instrument designated Lease No. OP-4404. Thereafter such lease, insofar as it pertained to the land in question, was assigned to General Petroleum Corporation by Mr. Creager. Subsequently, K. L. Kellogg & Sons, a partnership, under contract with General Petroleum Corporation, drilled the said well at a location, described as being:

329.41 feet Northerly on the Westerly line of Section 6, Township 19 North, Range 23 East, G. & S.R.B.M. from the West Quarter corner and 348.23 feet Easterly at right angles.

The well was completed as a duster on or about February 17, 1949.

Charles and the second of the second of the second

the permit (5-9)

IJ

Hr. James L. Finley September 18, 1958 Page 2

After the completion, an agreement was entered into with Mr. John Jones, then having interest in the premises - as the State of Arizona's grazing lessee - whereby Mr. Jones released General Petroleum Corporation from any claim or damage for certain alleged losses and General Petroleum Corporation executed a Bill of Sale, conveying to said John Jones, 849 feet of 13-3/8" casing left at the above described well location. A part of the consideration for the Bill of Sale was a covenant on the part of Mr. Jones that in the event the aforesaid well was not converted into a water well within a period of ninety (90) days from March 14, 1949, he would immediately proceed with the final abandonment thereof, complying with all of the laws, rules and regulations of the State of Arizona applicable to the final abandonment of eil wells, all at his sole cost and expense.

On August 28, 1952 and again on September 17, 1952, Mrs. Ella Maybelle Jones, widew, and executor of the estate of John Jones, filed a Report of Improvements Placed on State Lands Prior to June 26, 1952. This report was filed in accordance with the previsions of the Act of 1952 (Chapter 117, Session Laws of Arisona, 20th Legislature, 2nd Regular Session). The total improvements listed in Section 6, 19 N., 23 E. consisted of "one mile 3 wire fence".

It is readily apparent from the above that Mr. Jones did not exercise his right to make the conversion of the well. This emission coupled with the lack of mention in the 1952 filing of improvements can lead me to but one conclusion, namely:

The entire well and casing under the law as it now stands is the property of the State of Arisona, and consequently I feel that the oil and gas lessee and applicant for a permit to rework the well and test the same for oil and gas will be entitled to such permit providing all terms of the Oil and Gas Conservation Act of 1951 are met.

612 SOUTH FLOWER STREET LOS ANGELES 54, CALIFORNIA

September 15, 1958

Mr. Frederick C. Ryan, Supervisor Oil and Gas Conservation Division State Land Department State of Arizona Phoenix, Arizona

Dear Mr. Ryan:

Mr. Bermingham has asked me to respond to your letter to him of August 29, concerning a certain dry hole in Navajo County, Arizona.

Our records disclose that the well in question was drilled on land originally covered by and described in an Oil and Gas Prospecting Permit granted by the State Land Department of Arizona to George C. Creager by instrument designated Lease No. OP-4404. Thereafter such lease, insofar as it pertained to the land in question, was assigned to General Petroleum Corporation by Mr. Creager. Subsequently, K. L. Kellogg & Sons, a partnership, under contract with General Petroleum Corporation, drilled the said well at a location, described as being:

> 329.41 feet Northerly on the Westerly line of Section 6, Township 19 North, Range 23 East, G. & S.R.B.M. from the West Quarter corner and 348.23 feet Easterly at right angles.

The well was completed as a duster on or about February 17, 1949.

After the completion, an agreement was entered into with a certain Mr. John Jones, then having some interest in the premises presumably as the State of Arizona's grazing lessee - whereby Mr. Jones released General Petroleum Corporation from any claim or damage for certain alleged losses and General Petroleum Corporation executed a Bill of Sale, conveying to said John Jones, 849 feet of 13-3/8" casing left at the above described well location. A part of the consideration for the Bill of Sale was a covenant on the part of Mr. Jones that in the event the aforesaid well was not converted into a water well within a period of ninety (90) days from March 14, 1949, he would immediately proceed with the final abandonment thereof, complying with all of the laws, rules and regulations of the State of Arizona applicable to the final abandonment of oil wells, all at his sole cost and expense.

By instrument dated December 2, 1949, General Petroleum Corporation reassigned to George C. Creager the lands upon which said well

1/1 permut 1591

GEÑERAL PETROLEUM CORPORATEN

Mr. Frederick C. Ryan, Supervisor - 2 -

September 15, 1958

was located. Your records should disclose copies of most of these instruments. However, to provide you with proof of the sale of the casing to Mr. Jones and his agreement concerning the conversion of the well into a water well, I am enclosing photostatic copies of the Bill of Sale, dated March 14, 1949, and a letter agreement between General Petroleum Corporation and Mr. Jones of that same date.

It is our position that General Petroleum Corporation has no present interest or claim in either the lands in question or the well borer and casing. As a result of the items previously mentioned, any forfeiture to the State pursuant to the provisions of the Act of June, 1952 would have resulted from certain omissions or commissions of parties who obtained their interest from this Corporation. However, it is apparent that there is some difference of opinion concerning the amount of casing granted and obligations of the parties concerning the abandonment of the well.

In any event, we trust the attachments will be of value to you. Should there be further information needed, we will endeavor to assist you. Please feel free to retain the enclosures and to further call upon us.

Yours very truly,

Robert H. Buchanan

Mr. John Jones Holbrook, Arisona

Dear Sir:

This letter is a supplement to the Bill of Sale, which Bill of Sale covers the sale of certain 13-3/8" casing in the hole of our Creager State Well No. 14-6, the location of which is more particularly described in said Bill of Sale.

As additional consideration and in order to induce us to deliver to you the said Fill of Sale, it is our understanding that you desire to convert the said well and use the said casing in the said hole for a water well.

If you do not convert the said well into a water well within a period of sixty (60) days from the date hereof, then you shall immediately proceed with the final abandomment of the Creager State Well No. 14-6 and comply with all of the laws, rules and regulations of the State of Arisona applicable to the final abandomment of oil wells, all of which shall be done at your sole cost and expense.

As additional consideration for said Bill of Sale you hereby release General Petroleum Corporation from any obligation whatsoever to clean up and restore the surface of the ground upon which the said well is situated and you also release, acquit and discharge General Petroleum Corporation from any and all obligations and liabilities of any nature whatsoever with respect to damages to the land covered by your state grasing lease which may have resulted thereto during the drilling operations conducted by us on said land, and scknowledge that General Petroleum Corporation has no obligation or liability whatsoever with respect to the restoring of the land to a condition approximating that prior to our engaging in operations thereon and assume all obligations and liabilities with respect thereto which may be required by the State of Arisons.

Your understanding of the feregoing may be indicated by signing and returning to us the enclosed duplicate copy of this letter.

August 29, 1958

General Petroleum Corporation P. O. Box 2122 Terminal Annex Los Angeles 54, California

Attention: Mr. P. E. Bermingham General Counsel

Dear Mr. Bermingham:

This inquiry concerns present title to the casing of a well drilled by General Petroleum Corporation in Navajo County, Arizona, which was spudded in on December 17, 1948 and completed as a dry hole on February 17, 1949.

The well called the General Petroleum - Creager State No. 14-6, located in Section 6, Township 19 North, Range 23 East, Gila and Salt River Base and Meridian, was drilled to a total depth of 3432 feet and plugged back to 1493 feet to abandon. According to our records the plug was placed at this depth with the idea in mind of the State Grazing lessee at the time, John Jones, taking over the well for the development of water. This development apparently did not take place because in July of 1954, a succeeding Grazing lessee, Roy R. Young, informed the State Land Department by letter that he had purchased the casing in the well (consisting of 775 feet of J-55, 13-3/8 inch, 54.5 pound casing plus 12 feet of 20 inch ground casing, all cemented in) and would proceed imagdiately to convert the well into a producing water well. The present Grazing lessee, James L. Finley, successor to Mr. Young, says that the well has not as yet been converted to a water well but that he plans to do so in the future, and additionally, that he believes he has title to the hole and casing by virtue of his purchase of the Grazing lease from Mr. Young; that there is in existence a bill of sale from General Petroleum to one of his predecessors (probably Mr. Young) for the casing and hole. Mr. Finley has not yet produced this document.

no Dermy 1591

General Petroleum Corporation -2-

August 29, 1958

The action that has precipitated inquiry back into these old records is the application to this office by an operator for a permit to run electric logs and perhaps rework the well. Before issuance of permit we are trying to secure all the facts possible to complete the picture as to title, equities, etc., although we have been advised that probably all such rights may have been forfeited to the State by lack of the action of recording such improvements with the land Department as called for by an Act of the Legislature which became effective in June of 1952.

My purpose in writing to General Petroleum is to ascertain if a bill of sale or quit-claim to the casing and hole was executed by that Corporation in favor of one of the Grazing lessees mentioned above. I realize that your Department is not the repository for such information but I believe that it would have a certain interest in the problems posed. In directing this inquiry to you I am presuming on the thin tie of the helpful advisory work on our Conservation Rules your Department has done for us through the firm of Tyley, Carlock and Ralston, and hope you will overlook such presumption in the interest of speedy action as it affects this end.

Thank you very much for your help in this matter.

Yery truly yours,

Frederick C. Ryan, Supervisor Oil and Gas Conservation Division

ถ

James L. Finley P. O. Box 136 Gilbert, Arizona.

August, 22, 1958

Mr. Obed M. Lassen State Land Commissioner State Land Department Phoenix, Arizona.

Dear Mr. Lassen:

Replying to your Department inquiry of the I4th regarding the status of the Oil Prospecting well in Section 6, Tp. I9 N R. 23 E.

At the time we purchased this ranch consisting of some 67000 acres and including the Grazing Lease on the above section, we were assured that the pipe, casing and all well rights had been purchased by the previous ranch owners from those who installed the well and improvements, and the Bill of Sale is in existance.

All lands and Grazing Leases including improvements owned by the previous owners were purchased by us.

It is my understanding that the previous owners did do some work toward developing stock water from this well, and since there is no other permanent water in that area of our ranch it is our plan as soon as time and funds permit, to develope this well to provide permanent water for our livestock so they may make better use of that partof our State Grazing Leases and deeded lands.

It is my information that the State has leased this section under oil and gas exploration lease and I see no reason for conflict with our grazing lease of same.

It is my further INTERNATION understanding that the present lessee's had no interest in the previous exploration or improvements; therefore, since our ownership of these improvements and the future development and use of the water from this well in connection with our State Grazing Lesse cannot possibly interfere with bona fide exploration exploration and development of the surrounding lands, , we trust we will receive your indulgence and cooperation in this matter.

Yours truly

James L. Finler

DLF W04-2501

August 14, 1958

Mr. James L. Finley P. O. Box 136 Gilbert, Arizona

Dear Mr. Finley:

In going over some of the records having to do with old oil and gas operations, a question has arisen as to the present status of a well drilled in 1949 as the General Petroleum - Creager #14-6 and located in the SW1 of Lot 5, (SWSWNW), of Section 6, Township 19 N., Range 23 E. As this section comes within your grazing lease No. 681, we are taking the liberty of imposing on your good nature in asking you for help in getting straightened out.

Specifically, our records show that your predecessor in interest, Mr. Roy R. Young, in August of 1954 considered converting the well named above into a stock-water well and may have gone so far as to reimburse General Petroleum for the surface casing in the well. Since Mr. Young did not, prior to his sale of the ranch, list such a well with the Land Department as an improvement, we do not carry a record of any such conversion having been accomplished. Our question to you is, did you, when taking over the lease from Mr. Young succeed to any specific rights in this well, up to, and including taking it over as a developed stock well? If so, your lease record as well as our oil and gas conservation records can be brought fully up to date by supplying us with any quit-claim or bill of sale executed by General Petroleum to either Mr. Young or yourself covering the well, casing etc.

Thank you for your cooperation and help.

Very truly yours,

STATE LAND COMMISSIONER

By: Frederick C. Ryan, Supervisor, Oil & Gas Conservation

PS: Inclosed are three blanks for reporting this well as an improvement if you have actually taken it over as a stock-watering well.

If so, report should be filed in duplicate.
